BURROWS, M. The search for principles of neuronal organization. 1

MURPHEY, R. K., WALTHALL, W. W. AND JACOBS, G. A. Neurospecificity in the cricket cercal system. 7

LEVINE, RICHARD B. Changes in neuronal circuits during insect metamorphosis . . 27

BASTIANI, MICHAEL, PEARSON, KEIR G. AND GOODMAN, COREY S. From embryonic fascicles to adult tracts: organization of neuropile from a developmental perspective. 45

FISCHBACH, K. F. AND HEISENBERG, M. Neurogenetics and behaviour in insects . 65

ALKON, DANIEL L. Changes of membrane currents during learning 95

HAWKINS, R. D. A cellular mechanism of classical conditioning in *Aplysia* 113

MILLER, JOHN P. AND JACOBS, GWEN A. Relationships between neuronal structure and function 129

MARDER, EVE. Roles for electrical coupling in neural circuits as revealed by selective neuronal deletions. 147

WONG, R. K. S., MILES, R. AND TRAUB, R. D. Local circuit interactions in synchronization of cortical neurones 169

SPIRA, MICHA E., YAROM, Y. AND ZELDES, D. Neuronal interactions mediated by neurally evoked changes in the extracellular potassium concentration 179

PITMAN, ROBERT M. The versatile synapse 199

SHAW, S. R. Early visual processing in insects. 225

SIEGLER, M. V. S. Local interneurones and local interactions in arthropods 253

WINE, JEFFREY J. The structural basis of an innate behavioural pattern 283

ROBERTS, ALAN, DALE, N. AND SOFFE, S. R. Sustained responses to brief stimuli: swimming in *Xenopus* embryos 321

GRILLNER, STEN AND WALLÉN, PETER. How does the lamprey central nervous system make the lamprey swim? 337

Photographs of Meeting at Wakulla Springs 359
